

BACACIER®

COVEO® & SINUS® ROOF PROFILES

Custom lengths available
Large selection of colours
Simple and fast installation
Cost-effective and strong product

COVEO® and SINUS® are **ribbed and corrugated profiles** from BACACIER's, traditional range and are intended for **cold roof structures**. COVEO® trapezoidal profiles and SINUS® corrugated profiles can be used to cover all types of roofing (new or to be renovated). For **controlling condensation**, two solutions are available: absorbing (COVABSORB) and draining (COVDRAIN). To meet construction requirements, certain profiles can be **curved**.
